Installation: 2006

Materials: Strongcote SC112/113
Heavy Duty Traffic Membrane

Preparation: Shot Blast & Powerwash

Application: Squeegee/Broom Finish

This project involved the transformation of office space to interior parking. The two levels of parking area added consisted of 55,000 SF and required shotblasting to remove the existing floor tile adhesive. After surface prep was completed the SC-113 system was installed over the entire deck. The Strongcote was installed without interrupting the other trades or causing safety concerns as the products are Zero VOC and free of odor. Strongcote also provided masking ability over the several areas where previous floor coverings were removed.
