

SHIELD SYSTEMS, INC.

Moisture Protection Specialties

Project Name: Williams Technologies HQ
Owner: Williams Technologies
Address: 43 Williams Technology Center
Tulsa, OK 74103
Phone: 918-583-2617
Installation: 2001
Materials: Strongcrete SW-83
Strongcote SC112/113
Traffic Membrane
Preparation: Shot Blast
Application: Squeegee/Back Roll

This parking deck consist of pre-cast pre-topped slabs totaling 260,000 square feet. The topping slab installed at the pre-cast plant proved very inconsistent. Originally a deck sealer was specified for a finish coating to provide a waterproofing protection. However, HOK Architects and EDM Engineering of St. Louis recommended a switch to Strongcote in order to install a system capable of a high build finish.

Installing SC-113 System
